PROFILE

Graduate student in Computer Science with strong expertise in Full Stack Engineering and Artificial Intelligence. Proven ability to design, develop, and deploy scalable AI-powered web applications by integrating modern frontend frameworks, robust backend APIs, and machine learning models into production environments. Experienced in React, FastAPI, cloud deployment, CI/CD automation, and LLM-based solutions. Passionate about building efficient, data-driven systems with clean architecture, performance optimization, and real-world impact.

PROFESSIONAL EXPERIENCE

Full Stack AI Engineer Intern
BN Associates Inc.

Aug 2025 – Present | Remote, TX

Product: Automated Recruiting Intelligence Platform (V1)

Core Stack: Python, Pandas, FastAPI, React.js, Docker, GitHub Actions, AWS EC2, Vercel

- Led the end-to-end design and development of Version 1 of an AI-powered recruiting intelligence platform automating job-change detection and recruiter outreach workflows.
- Architected a scalable full-stack system integrating FastAPI backend services, React.js dashboards, structured data ingestion pipelines, and cloud deployment infrastructure.
- Engineered high-performance data comparison pipelines using Pandas to analyze weekly LinkedIn employee datasets and detect company and role transition signals.
- Designed intelligent hiring-signal logic to identify emerging recruitment opportunities and surface key hiring decision-makers using historical company data.
- Developed secure, production-grade RESTful APIs to expose processed hiring intelligence to frontend applications with optimized response handling.
- Established GitHub repository architecture, branching strategies, and version control standards to ensure scalable and maintainable team collaboration.
- Automated CI/CD workflows using Docker and GitHub Actions, enabling consistent build, test, and deployment processes across environments.
- Implemented secure configuration management using virtual environments, environment variables (.env), and environment isolation best practices.
- Deployed backend services on AWS EC2 and frontend applications on Vercel, optimizing scalability, reliability, and production readiness.
- Applied performance tuning and backend optimization techniques to improve data processing efficiency and overall system responsiveness.
- Built automated data acquisition pipelines leveraging Bright Data services to extract structured employee information across organizations, supporting scalable job-change signal detection workflows.

PROJECTS

Parenting Navigator

Aug 2024 – Dec 2024 | Front-End Developer

- Developed a responsive parenting support platform using React, HTML, CSS, and JavaScript.
- Used Firebase Realtime Database for live milestone tracking.
- Implemented Firebase Cloud Storage for multimedia handling.
- Deployed application on Firebase Hosting with version control.
- Collaborated on UI/UX improvements and frontend documentation.

Home Remedies and Science

Jan 2024 – May 2024 | AI / ML Developer

- Built an AI-powered wellness recommendation system combining Ayurveda knowledge and ML models.
- Implemented Random Forest for structured data and DistilBERT for text-based predictions.
- Developed Flask APIs for real-time AI model integration.
- Evaluated models using accuracy, precision, recall, and F1-score metrics.

EDUCATION

Master of Science in Computer Science & Engineering

Aug 2023 – May 2025

University of North Texas, TX, USA

Bachelor of Technology in Computer Science and Engineering

Jun 2019 – Apr 2023

K L University, Andhra Pradesh, India

TECHNICAL SKILLS

- **Frontend:** React.js, HTML, CSS, Bootstrap, JavaScript, Responsive UI/UX
- **Backend:** FastAPI, Flask, REST APIs
- **Programming:** Python, C, C++, JavaScript
- **AI / ML:** TensorFlow, Keras, PyTorch, scikit-learn, NLP, LLMs, Hugging Face
- **Databases:** PostgreSQL, Firebase Realtime DB, MongoDB
- **Cloud & DevOps:** AWS ECS, Docker, GitHub Actions
- **Tools:** Git, GitHub, VS Code, Google Colab, Node.js

EXTRACURRICULAR

- Radio Jockey (RJ), KL University Radio (Oct 2019 – May 2021)
- Participated in AI-focused hackathons and coding competitions.
- Contributed to open-source projects integrating AI with web applications.
