SUMMARY

- Graduate student in Computer Science with hands-on experience in **Frontend Web Development** and **AI/ML/Generative AI**.
- Proficient in building responsive web interfaces using React, HTML, CSS, Bootstrap, and JavaScript.
- Experienced in developing ML/DL models with Python, TensorFlow, Keras, PyTorch, and scikit-learn, including NLP and LLMs.
- Built and deployed AI-powered web applications with real-time databases, secure authentication, and cloud hosting (Firebase, AWS).
- Skilled in CI/CD pipelines, automated testing, data preprocessing, feature engineering, and model evaluation.
- Integrated AI models into interactive web applications such as Parenting Navigator and wellness recommendation systems.
- Strong collaborator with Agile practices, Git/GitHub version control, and experience in hackathons, coding competitions, and workshops.

EDUCATION

University of North Texas

Master of Science in Computer Science & Engineering

TX, USA

Aug 2023 – May 2025

K L University, Andhra Pradesh, India

Bachelor of Technology in Computer Science and Engineering

AP, India

Jun 2019 – Apr 2023

INTERNSHIP

Software Engineer Intern

BN Associates Inc. – Remote, TX

Aug 2025 – Present

- Developing and maintaining responsive web interfaces for the AI Recruiting Project, ensuring cross-device compatibility and smooth user experience.
- Integrating LLMs, LangChain, and Hugging Face models for intelligent candidate matching, improving automation and recruitment accuracy.
- Implementing CI/CD pipelines for automated frontend deployments and continuous integration.
- Enhancing application performance, usability, and responsiveness across platforms.
- Conducting code reviews and providing constructive feedback to maintain high code quality.
- Monitoring application performance, identifying bottlenecks, and applying optimizations for better speed and reliability.
- Documenting development processes, API integrations, and AI model workflows for maintainability and team collaboration.

EXPERIENCE

Web Application Penetration Tester Intern

Aug 2021 – Dec 2021

Indian Servers - Software Development Company, India

- Conducted web application vulnerability assessments to identify weaknesses and improve frontend security.
- Provided actionable recommendations to enhance interface safety and data protection.
- Utilized tools such as Burp Suite and OWASP methodologies to detect and mitigate security flaws.

PROJECTS

Parenting Navigator (Aug 2024 – Dec 2024)

Role: Front-End Developer

- Designed and developed a responsive parenting support platform to help families track milestones and access daily tips.
- Built the frontend using React, HTML, CSS (Bootstrap), and JavaScript for cross-device compatibility.
- Integrated Firebase Authentication for secure user login and data protection.
- Utilized Firebase Realtime Database for live updates of child development information.
- Implemented Firebase Cloud Storage for multimedia file management.
- Deployed the web app on Firebase Hosting with version control for continuous availability.
- Collaborated with team members to enhance UI/UX and document frontend workflows.

Home Remedies and Science (Jan 2024 – May 2024)

Role: AI / ML Developer

- Developed an AI-powered wellness recommendation system combining Ayurveda insights with machine learning.
- Collected and preprocessed structured data for dietary, lifestyle, and herbal remedies.
- Implemented Random Forest and distilBERT for structured and unstructured data predictions.
- Built Flask APIs to interface AI models with web-based frontend for live recommendations.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics.
- Deployed and tested models in Google Colab and VS Code, ensuring reproducibility.
- Documented workflows, hyperparameters, and evaluation strategies for maintainability.

TECHNICAL SKILLS

- **Frontend Web Development:** HTML, CSS, JavaScript, React, Responsive UI/UX, Bootstrap.
- **Programming Languages:** Python, C, C++, JavaScript.
- **Machine Learning / AI / Generative AI:** TensorFlow, Keras, scikit-learn, PyTorch, NLP, LLMs, Hugging Face.
- **Databases:** PostgreSQL, Firebase Realtime DB, MongoDB.
- **Tools / Platforms:** Git, GitHub, VS Code, Google Colab, Docker, Node.js, AWS ECS.

EXTRACURRICULAR

- Radio Jockey (RJ) at KL University Radio, Vijayawada — Oct 2019 – May 2021
- Participated in hackathons and coding competitions focusing on AI and web development.
- Contributed to open-source projects integrating AI models with interactive web interfaces.
